- Technical Support manager

Course Overview

This course builds on the foundation of the CA API Gateway with focus on the Gateway Migration Utility (GMU). You will review the installation and configuration of the Gateway Migration Utility. Pre-requisites to each of the installation steps will be reviewed and files needed for installation will be identified.

You will see demonstrations on each of the key installation steps and a final demonstration show the migration of policy and identify providers.

Last, you will learn a number of best practice recommendations identified as key to the successful implementation and use of the Gateway Migration Utility.

This Course Will Show You How To:

- Describe the purpose and use of the Gateway Migration Utility (GMU)
- Explain how to prepare for migration of CA API Gateway policies, services and entities
- Configure the Gateway Migration Utility and CA API Gateways for migration
- Run the Gateway Migration Utility and explain basic utility commands
- Identify migration tips and best practices
