

CA API Developer Portal Enhanced Experience 4.1: New Features 200

PRODUCT RELEASE

CA API Developer Portal Enhanced Experience 4.1

COURSE TYPE, LENGTH & CODE

- Web-based Training (WBT)
- One Half (.5) Hour
- 40AMO20110

PREREQUISITES

- Working knowledge of CA API Developer Portal Enhanced Experience 4.0

Course Overview

APIs are becoming ubiquitous as enterprises increasingly need to open up to mobile devices, cloud-based services, partners and third-party developers. CA API Developer Portal Enhanced Experience provides a single solution that can not only accommodate internal API initiatives to empower in-house developers, but can also act as the cornerstone of external API initiatives with partner access, cloud integration, mobile enablement and so on.

By eliminating the need to deploy multiple solutions from multiple vendors, CA API Developer Portal Enhanced Experience can greatly reduce technology acquisition costs, infrastructure requirements and maintenance overhead. In this course, you will quickly become familiar with the new features available with CA API Developer Portal Enhanced Experience 4.1.

What You Will Learn

- Understand the CA API Developer Portal Enhanced Experience component architecture
- Understand how the Policy Builder enables you to publish an API with multiple policy templates
- Understand how to manage APIs by organizations and easily switch between organizations
- Understand how the changes to the default access for organization administrators has been extended to enable them to manage their own APIs
- Understand that you now use the CA Jarvis backing service for persisting analytics data
- Understand the enhancements made to system APIs enable you to script additional portal operations using Portal and Metrics APIs

WHO SHOULD ATTEND

- Application Developer
- API Portal Administrator
- Implementation Consultant
- Service Support Manager
- Technical Support Manager

For Managers

With the veritable explosion of mobile technology, the rise of the cloud, and the emergence of the Internet of Things, the enterprise today is being forced to expose data once considered sacred to a shareable asset outside the organization. The CA API Management suite provides enterprises with a comprehensive set of solutions that externalize the data and services exposed by APIs in a secure, reliable, and manageable way. The “storefront” of the suite is the CA API Developer Portal Enhanced Experience, which helps to engage and onboard internal and third-party developers. In this course, your team will be able to quickly become familiar with the new features available in CA API Developer Portal Enhanced Experience 4.1.
