CA API Management SaaS: Foundations 200

PRODUCT RELEASE

CA API Management SaaS

Course Overview

APIs are becoming ubiquitous as enterprises increasingly need to open up to mobile devices, cloud-based services, partners and third-party developers. CA API Developer Portal Enhanced Experience provides a single solution that can not only accommodate internal API initiatives to empower in-house developers, but can also act as the cornerstone of external API initiatives with partner access, cloud integration, mobile enablement and so on.

By eliminating the need to deploy multiple solutions from multiple vendors, CA API Developer Portal Enhanced Experience can greatly reduce technology acquisition costs, infrastructure requirements and maintenance overhead. In this course, you will quickly become familiar with the features available with CA API Management SaaS so that you can effectively manage APIs and application with developers.

COURSE TYPE, LENGTH & CODE

- Web-based Training (WBT)
- Two (2) hours
- 40AMS20020

WHO SHOULD ATTEND

- Application Developer
- API Portal Administrator
- Implementation Consultant
- Service Support Manager
- Technical Support Manager

For Managers

With the veritable explosion of mobile technology, the rise of the cloud, and the emergence of the Internet of Things, the enterprise today is being forced to expose data once considered sacred to a shareable asset outside the organization. The CA API Management suite provides enterprises with a comprehensive set of solutions that externalize the data and services exposed by APIs in a secure, reliable, and manageable way. The "storefront" of the suite is the CA API Management SaaS product, which helps to engage and onboard internal and third-party developers. In this course, your team will be able to quickly become familiar with the product so that they can use the features available in it to effectively manage the interaction of your companies APIs and applications with developers.
