

CA Workload Automation iDash Version 12.x: Introduction 100

Course Overview

CA Workload Automation iDash (CA iDash) is designed to help you consistently deliver on service level guarantees to your clients. It applies advanced predictive analytics in real time to create efficient and finely-tuned environments for CA Workload Automation AE and CA Workload Automation CA 7® Edition.

CA Workload Automation iDash is designed to help you visualize complex relationships more easily, proactively monitor SLA and Critical Path thresholds and alerts and execute recovery actions when thresholds are at risk of being missed.

This course focuses on introducing you to CA Workload Automation iDash, Version 12.x, and its unique components and functions.

PRODUCT RELEASE

CA Workload Automation iDash
Version 12.x
