

CA PPM 14.3: Partitioning Using Studio 300

PRODUCT RELEASE

CA PPM 14.3

COURSE TYPE, LENGTH & CODE

- Dynamic Labs
- Five (5) Hours
- Course Code: 33CLR3043S

PREREQUISITES

Knowledge of CA PPM Studio configuration, equivalent to the following course:

- CA PPM 14.3: Objects, Attributes, and Views 300
Course Code: 33CLR3042S
Eight (8) Hours

WHO SHOULD ATTEND

- Project Manager
- IT Manager
- Project Management Office
- CA PPM Administrator

Course Overview

Completing projects on time, on budget, and within scope is critical to the business and requires the very best in project and portfolio management solutions. CA PPM 14.3 (CA PPM) helps you drive strategic initiatives across your entire enterprise by managing your dynamic business requirements, complex projects, global resources, and shrinking budgets. Partitions enforce centralized governance requirements and enable administrators to maintain information relevant to their operations. This course is designed for the administrator who will enhance CA PPM by creating partitions to meet the exact requirements of the organization. Topics include setting up partitions and understanding the impact of partitions on CA PPM functionality. The concepts and labs in this training will help you to accurately and efficiently configure the system for a more effective implementation. This is a SELF-DIRECTED class consisting of 5 hours of self-directed learning including lab activities.

What You Will Learn

- Design and build partitions to manage multiple organizational needs
- Create and manage new and custom objects for different partitions to meet specific needs of your organization
- Configure UI themes for different partitions to rebrand the application to suit their business requirements.

For Managers

Correctly configuring the application to meet organizational needs helps shorten deployment time, reduce risk, and lower costs. This class is designed for those IT staff resources that will configure the application. Students will be shown how to use Studio and how to customize the system as needed with partitions. The skills to accurately and efficiently configure the system will help ensure smoother and more effective implementations.

These classes can be credited toward Project Management Professional Development Units (PDUs) from the Project Management Institute® (PMI®).
