

CA PPM 14.3: Building Portlets Using Studio 300

PRODUCT RELEASE

CA PPM 14.3

COURSE TYPE, LENGTH & CODE

- Dynamic Labs
- Thirteen (13) Hours
- Course Code: 33CLR3044S

PREREQUISITES

Knowledge of CA PPM Studio configuration, equivalent to the following course:

- CA PPM 14.3: Objects, Attributes, and Views using Studio 300
Course Code: 33CLR3042S
Eight (8) Hours

WHO SHOULD ATTEND

- Project Manager
- IT Manager
- Project Management Office (PMO)

Course Overview

Completing projects on time, on budget, and within scope is critical to the business and requires the very best in project and portfolio management solutions. CA PPM 14.3 (CA PPM) helps you drive strategic initiatives across your entire enterprise by managing your dynamic business requirements, complex projects, global resources, and shrinking budgets.

Portlets are snapshots of application data that you can create and configure. This course is designed for the administrator who will enhance CA PPM by creating portlets to meet the exact requirements of the organization. Topics include creating HTML, grid, filter, NSQL, chart, and drilldown portlets and personalizing pages and tabs. The concepts and labs in this training will help you to accurately and efficiently configure the system for a more effective implementation. This class consists of 13 hours of SELF-DIRECTED learning including lab activities.

What You Will Learn

- Define multiple portlets on a single page to increase efficiency by eliminating navigation between multiple pages
- Provide users with access to information inside or outside the application
- Enhance the presentation of the application using grid, filtering, NSQL, chart, and drilldown portlets

For Managers

Correctly configuring the application to meet organizational needs helps shorten deployment time, reduce risk, and lower costs. This class is designed for those IT staff resources that will configure the application. Students will be shown how to use Studio and how to customize the system as needed with a wide variety of portlets and personalization of pages and tabs. The skills to accurately and efficiently configure the system will help ensure smoother and more effective implementations.

These classes can be credited toward Project Management Professional Development Units (PDUs) from the Project Management Institute® (PMI®).
