

# CA PPM 14.3: Studio Dashboarding, UI Themes, and Content Management 300

## Course Overview

Completing projects on time, on budget, and within scope is critical to the business and requires the very best in project and portfolio management solutions. CA Project & Portfolio Management 14.3 (CA PPM) helps you drive strategic initiatives across your entire enterprise by managing your dynamic business requirements, complex projects, global resources, and shrinking budgets.

This course is designed for the administrator who will enhance CA PPM by customizing the interface and migrating content to meet the exact requirements of the organization. Topics include configuring personal dashboarding, migrating UI themes, and administering content management. The concepts and labs in this training will help you to accurately and efficiently configure the system for a more effective implementation. This is a SELF-DIRECTED class consisting of 8 hours of self-directed learning including lab activities.

### PRODUCT RELEASE

CA PPM 14.3

---

### COURSE TYPE, LENGTH & CODE

- Dynamic Labs
- Five (5) Hours
- Course Code: 33CLR3045S

---

### PREREQUISITES

Knowledge of CA Clarity PPM Studio configuration, equivalent to the following courses:

- CA PPM 14.3: Partitioning Using Studio 300  
Course Code: 33CLR3043S  
Five (5) Hours
- CA PPM 14.3: Building Portlets Using Studio 300  
Course Code: 33CLR3044S  
Thirteen (13) Hours

---

## What You Will Learn

- Configure personal dashboarding to enable users to view system information and collaborate with other users without the need of Studio administrators
- Migrate the UI theme of your application to suit your business requirements
- Provide an easy mechanism for importing and exporting selective content from one system to another

---

## For Managers

Correctly configuring the application to meet organizational needs helps shorten deployment time, reduce risk, and lower costs. This class is designed for those IT staff resources that will configure the application. Students will be shown how to use Studio and how to customize the interface and migrate content. The skills to accurately and efficiently configure the system will help ensure smoother and more effective implementations.

These classes can be credited toward Project Management Professional Development Units (PDUs) from the Project Management Institute® (PMI).
