

CA PPM 15.1: Studio Capstone 300

Course Overview

Completing projects on time, on budget, and within scope is critical to the business and requires the very best in project and portfolio management solutions. CA Project and Portfolio Management 15.1 (CA PPM) helps you drive strategic initiatives across your entire enterprise by managing your dynamic business requirements, complex projects, global resources, and shrinking budgets.

This course is designed for the administrator who wishes to test their knowledge of CA PPM Studio by working in a scenario-based lab environment. This course will challenge the student to listen to customer requirements, then define, implement and test the solution. This is a SELF-DIRECTED class consisting of 8 hours of self-directed learning including lab activities.

PRODUCT RELEASE

CA PPM 15.1

COURSE TYPE, LENGTH & CODE

- Videos
- Dynamic Labs
- Eight (8) Hours
- Course Code: 33CLR3079S

PREREQUISITES

- Good working knowledge of the studio functionality in CA PPM
- Working knowledge of SQL

WHO SHOULD ATTEND

- CA PPM Administrator
- IT Managers

Tasks include

- Listen to the customer videos
- Determine which CA PPM features will best meet the customer requirements
- Implement the requirements and test the solution

For Managers

Correctly configuring the application to meet organizational needs helps shorten deployment time, reduce risk, and lower costs. This class is designed for those CA PPM Administrators and IT staff resources that will configure the application. Students will be tested on their ability to identify a solution from a set of customer requirements. For those without solid experience with CA PPM Studio, suggest taking our series of courses: 33CLR3075S, 33CLR3076S, 33CLR3077S and 33CLR2078S (or 33CLR3085F ILT/VL bundle).
