

CA IT Asset Manager: SAM 4.1 Catalog Foundations 200

Course Overview

IT departments are constantly being forced to do more with less, including IT software assets. Governing many of these software assets are contracts, such as maintenance, warranties, and lease agreements. Left unmanaged, these assets can consume a significant amount of an organization's IT budget and expose it to considerable risk.

CA IT Asset Manager 14.1 (CA ITAM) is a comprehensive solution to handle software license management challenges through its Software Asset Manager 4.1 (SAM) capabilities. By managing software assets using SAM, you can reduce costs and minimize risk.

In this course, you will be taught to navigate the product catalog hierarchy; identify data sources for extending the master catalog; and record product data.

This class consists of 3.25 hours of SELF-DIRECTED learning including lab activities.

PRODUCT RELEASE

CA IT Asset Manager 14.1
Software Asset Manager 4.1

COURSE TYPE, LENGTH & CODE

- Dynamic Labs
- Three and a Quarter (3.25) Hours
- 33ITA2060S

PREREQUISITES

- CA IT Asset Manager: SAM 4.1 Getting Started 200 33ITA2059S Six and a Half (6.5) Hours

WHO SHOULD ATTEND

- IT Asset Administrators

What You Will Learn

- Navigate the Master Catalog efficiently.
