# CA IT Asset Manager: SAM 4.1 Contract Foundations 200

**PRODUCT RELEASE**

CA IT Asset Manager 14.1

Software Asset Manager 4.1

## Course Overview

IT departments are constantly being forced to do more with less, including IT software assets. Governing many of these software assets are contracts, such as maintenance, warranties, and lease agreements. Left unmanaged, these assets can consume a significant amount of an organization's IT budget and expose it to considerable risk.

CA IT Asset Manager 14.1 (CA ITAM) is a comprehensive solution to handle software license management challenges through its Software Asset Manager 4.1 (SAM) capabilities. By managing software assets using SAM, you can reduce costs and minimize risk.

In this course, you will be taught to record contracts and enrollments; assign contracts and enrollments to licenses; establish a relationship between a contract and master agreement; and identify contract scope considerations.

This class consists of 3.25 hours of SELF-DIRECTED learning including lab activities.

**COURSE TYPE, LENGTH & CODE**

- Dynamic Labs
- Three and a Quarter (3.25) Hours
- 33ITA2061S

**PREREQUISITES**

- CA IT Asset Manger: SAM 4.1 Catalog Foundations 200 33ITA2060S Three and a Quarter (3.25) Hours

**WHO SHOULD ATTEND**

- IT Asset Administrators

## What You Will Learn

- Capture software entitlements contained in contracts and enrollments
- Assign contracts and enrollments to their related licenses
- Relate contracts to a master agreement
- Take into consideration organizational, geographic, and other scopes when working with contracts

## For Managers

Software assets can consume a large amount of your IT budget and expose your organization to considerable risk.

CA ITAM is a comprehensive product to help your IT asset administrators handle software management challenges through its SAM component. By using SAM, they can help lower your organization's costs and risk exposure.

In this course, your administrators will acquire foundation-level skills with the SAM contract feature.
