

CA IT Asset Manager: SAM 4.1 Roles and Compliance Reporting Foundations 200

PRODUCT RELEASE

CA IT Asset Manager 14.1
Software Asset Manager 4.1

Course Overview

IT departments are constantly being forced to do more with less, including IT software assets. Governing many of these software assets are contracts, such as maintenance, warranties, and lease agreements. Left unmanaged, these assets can consume a significant amount of an organization's IT budget and expose it to considerable risk.

CA IT Asset Manager 14.1 (CA ITAM) is a comprehensive solution to handle software license management challenges through its Software Asset Manager 4.1 (SAM) capabilities. By managing software assets using SAM, you can reduce costs and minimize risk.

In this course, you will be taught to identify SAM roles and license inventory, software inventory, and compliance check tasks; and verify license and software inventory for report compliance.

This class consists of 3.25 hours of SELF-DIRECTED learning including lab activities.

COURSE TYPE, LENGTH & CODE

- Dynamic Labs
- Three and a Quarter (3.25) Hours
- 33ITA2064S

PREREQUISITES

- CA IT Asset Manager: SAM 4.1 Software Inventory Engineering Foundations 200
