- One (1) Hour
- Course Code: 33ITA20740

PREREQUISITES

- Familiarity with Microsoft Windows
- Familiarity with personal computer applications
- Familiarity with asset management processes

WHO SHOULD ATTEND

- IT Asset Administrators

Course Overview

An effective business demands accurate and concise accounting of IT assets. Asset Portfolio Management (APM), a module of CA IT Asset Manager (CA ITAM), helps you manage the physical and financial aspects of hardware assets whether on-site, virtual, or in the cloud so you can reduce costs, automate asset lifecycle management, and enable vendor and contract optimization with a single, integrated solution.

In this course, you will cover the key asset management concepts as they relate to CA ITAM-APM. You will also discover how CA ITAM-APM integrates with other CA Technologies products and explore the key features of the product.

What You Will Learn

- Describe Asset Management concepts.
- Describe the integration of the CA ITAM-APM solution with other CA Technologies products.
- Identify the key features of CA ITAM-APM.

For Managers

Your staff will examine the key asset management concepts as they relate to CA ITAM-APM, discover how CA ITAM-APM integrates with other CA Technologies products, and explore the key product functionalities.
