

# CA API Management SaaS 4.0: New Features 200

## Course Overview

Traditional businesses are being forced to open up to their employees, customers, and partners who want to use mobile devices to interact with and access enterprise resources. Unfortunately, most enterprise resources are not mobile friendly. The simplest and most cost-effective way to create mobile apps for these enterprise resources is through APIs.

CA API Management SaaS enables enterprises to transform their closed business into an open enterprise by securely exposing their application and data APIs to app developers, while giving them all the tools and resources they need to quickly build apps against them. In this course, you will quickly become familiar with the new features available with CA API Management SaaS 4.0.

---

### PRODUCT RELEASE

CA API Management SaaS 4.0

---

### COURSE TYPE, LENGTH & CODE

- Web-based Training (WBT)
- Half (.5) Hour
- Course Code: 40AMS20010

---

### PREREQUISITES

- Working knowledge of CA API Management SaaS

---

## What You Will Learn

- Understand the updates to the API Portal UI that make it easier to enroll and manage multi-cluster CA API Gateways
- Identify the enhancements made to the Dashboard and Home pages that will help reduce the time needed to derive value from your APIM initiative
- Identify the enhancements to Portal APIs that can help you reduce the costs associated with remotely managing multiple instances of the API Portal
- Understand the new and enhanced analytics that combine API management data with your enterprise reporting systems to help you discover what you don't know

---

## WHO SHOULD ATTEND

- IT Facility Coordinator
- IT Security Manager
- IT Infrastructure Administrator or Engineer

## For Managers

The CA API Gateway product line protects applications exposed as web services, connects applications across security and identity domains, and validates policy compliance end-to-end across a transaction. CA API Management SaaS delivers a turnkey developer management and API lifecycle solution that enables you to securely expose your APIs while providing developers with all the information they need to create applications against them. Your team will be taught how to use the new features in the CA API Management SaaS solution to facilitate the development of new and innovative applications by securely exposing APIs within a protected portal environment.

---
