

CA API Gateway 9.0: New Features 200

PRODUCT RELEASE

CA API Gateway 9.0

COURSE TYPE, LENGTH & CODE

- Web Based Training (WBT)
- One (1) Hour
- 40API20150

PREREQUISITES

- Working knowledge of CA API Gateway 8.x

WHO SHOULD ATTEND

- Implementation Consultant
- Security Administrator
- Service Support Manager
- System Administrator
- Technical Support Manager

Course Overview

With the veritable explosion of mobile technology, the rise of the cloud, and the emergence of the Internet of Things, the enterprise today is being forced to expose data once considered sacred to a shareable asset outside the organization. The CA API Management suite provides enterprises with a comprehensive set of solutions that externalize the data and services exposed by APIs in a secure, reliable, and manageable way. The foundation of the suite is the CA API Gateway, which enables enterprises to write policies and rules that manage and secure all the API traffic.

In this course, you will quickly become familiar with new features introduced in version 9.0, which include support for solution kits, new commands available in the Tasks menu; the Swagger document validation assertion; enhancements to documentation and help; and deployment in Microsoft Azure.

What You Will Learn

- Install a solution kit using the Policy Manager
- Schedule a policy fragment to run at a specific time or interval
- Acquire an insight into connecting an on-premise CA API Gateway cluster to serve as the API proxy for a CA API Developer Portal SaaS installation
- Recognize improvements to Policy Manager and XML VPN Client help and Gateway AMI and Gateway Management Interfaces documentation
- Validate requests against the API from a Swagger document assertion
- Gain an understanding of the deployment of CA API Gateway in the Microsoft Azure VM depot environment

For Managers

The CA API Management suite provides enterprises with a comprehensive set of solutions that externalize the data and services exposed by APIs in a secure, reliable, and manageable way. In this course, your team will be able to quickly become familiar with the new features of CA API Gateway 9.0.

Course Agenda

Module 1: Describe New Features and Enhancements

- Describe how to install a solution kit
- Apply new items in the tasks menu
- Describe enhancements to documentation and help
- Describe how to configure a Swagger document validation assertion
- Describe support for deployment in Microsoft Azure
