

CA Mobile App Services 1.1: New Features 200

PRODUCT RELEASE

CA Mobile App Services 1.1

Course Overview

With the veritable explosion of mobile technology, the rise of the cloud, and the emergence of the Internet of Things, the enterprise today is being forced to expose data once considered sacred to a shareable asset outside the organization. The CA API Management suite provides enterprises with a comprehensive set of solutions that externalize the data and services exposed by APIs in a secure, reliable, and manageable way.

Enterprises of all sizes and shapes have been mobilizing their app assets in the quest for productivity gains and improved customer satisfaction. As complexity grows, apps take longer to bring to market and might be only supported on one platform. However, users want these apps quickly and on many different platforms.

CA Mobile App Services tackles the challenges of accelerating your IoT and mobile app projects by offering pre-defined sets of services, exposed as APIs and SDKs. This offering enables you to develop apps quickly, extend existing enterprise assets, and gain granular control using industry-leading API management and security capabilities of CA API Management. In this course, you will quickly become familiar with the new features of this CA API Management product.

COURSE TYPE, LENGTH & CODE

- Web-based Training (WBT)
- One (1) Hour
- 40API20280

PREREQUISITES

- Working knowledge of CA API Gateway 9.1 and CA Mobile API Gateway 3.1

What You Will Learn

- Understand which products are compatible with CA Mobile App Services, which enables you to determine which environments are necessary to run it
- Understand the capabilities of the new Android SDK, which enables you to access core MAS functionality to easily create mobile applications for Android devices
- Identify enhancements to CA Mobile APP Services that now enable it to be configured on dual CA Mobile API Gateway deployments
- Identify the enhancement that enables you to establish a secure connection between CA Mobile App Services and MQTT brokers
- Identify which iOS SDK frameworks are available as open source so that you are able to gain access to code that has the benefit of auditability, flexibility, and freedom to suit your needs

WHO SHOULD ATTEND

- Implementation Consultant
- Security Administrator
- Service Support Manager
- System Administrator
- Technical Support Manager
