

CA API Developer Portal r3.1: New Features 200

PRODUCT RELEASE

CA API Developer Portal r3.1

COURSE TYPE, LENGTH & CODE

- Web Based Training (WBT)
- One (1) Hour
- 40DPL20010

PREREQUISITES

- Working knowledge of CA API Developer Portal r3.0

WHO SHOULD ATTEND

- Application Developer
- API Portal Administrator
- Implementation Consultant
- Service Support Manager
- Technical Support Manager

Course Overview

With the veritable explosion of mobile technology, the rise of the cloud, and the emergence of the Internet of Things, the enterprise today is being forced to expose data once considered sacred to a shareable asset outside the organization. The CA API Management suite provides enterprises with a comprehensive set of solutions that externalize the data and services exposed by APIs in a secure, reliable, and manageable way. The “storefront” of the suite is the CA API Developer Portal, which helps to engage and onboard internal and third-party developers.

This course presents new features introduced in release 3.1. Through a series of concepts and demonstrations, you will quickly become familiar with installation and upgrade changes, improved security, monetizing API and account plans, SOAP and RAML enhancements, business and revenue reports, out-of-band email notifications, and other new features.

What You Will Learn

- Efficiently install or upgrade the CA API Developer Portal
- Configure password policies and prevent robots from registering for accounts
- Configure whether users must register for billing accounts when they move to a monetized API or account plan
- Apply SOAP and RAML enhancements effectively
- Gain insights into new registrants, portal users, API updates, and top revenue generators
- Ensure a timely approval of pending tasks using out-of-band email notifications

For Managers

The CA API Management suite provides enterprises with a comprehensive set of solutions that externalize the data and services exposed by APIs in a secure, reliable, and manageable way.

Through a series of concepts and demonstrations, your team will be able to quickly become familiar with the new features of CA API Developer Portal r3.1.
