

Continuous Delivery Ecosystem: Overview 100

Course Overview

The Continuous Delivery Ecosystem is a collection of CA products that integrate with each other, and with 3rd party systems, to manage the entire, end-to-end software planning, development, testing, and delivery lifecycle. The *Continuous Delivery Ecosystem: Overview 100* course teaches students the foundational concepts of the Continuous Delivery Ecosystem, and introduces the CA products utilized in this process. Course instruction is web-based and self-paced, and includes a demonstration video of the integrated products working together in a real-world scenario.

COURSE TYPE, LENGTH & CODE

- Web-based Training (WBT)
- Thirty (30) minutes
- 88ADO10320

PREREQUISITES

- General understanding of the software development lifecycle

RECOMMENDED NEXT COURSES

- CA Agile Central: Introduction; Course Code 33RLY10040
- OnDemand CA Agile Requirements Designer 1.x: Course Code Foundations 200; 88TCO20010
- CA API Management: Technical Overview 100; Course Code 40API10020
- DevTest Solutions 10: Overview 100; Course Code 88ADO10310
- OnDemand CA Test Data Manager 4.x: Overview 100; Course Code 88TDM10051
- CA BlazeMeter: Overview 100; Course Code 88BLZ10010
- CA Release Automation 6.x: Overview 100; Course Code 88RLA10310
- CA Release Automation Continuous Delivery Edition 6.x: Overview 100; Course Code 88CDD10010

What You Will Learn

- How the Continuous Delivery Ecosystem solves the challenges that span the software development life cycle
- The three pillars of successfully Continuous Delivery implementation
- The CA products that work together to create the Continuous Delivery Ecosystem:
 - CA Agile Central
 - CA Agile Requirements Designer
 - CA API Management
 - CA Service Virtualization
 - CA Application Test
 - CA Test Data Manager
 - CA BlazeMeter
 - CA Release Automation + Continuous Delivery Edition
- How the CA products work together along with 3rd party systems
