

OnDemand CA Client Automation 14.0: Asset Management 200

PRODUCT RELEASE

CA Client Automation 14.0

COURSE TYPE, CODE, DURATION

- Web Based Training (WBT)
 - Course Code: 88CLM20070
 - Four (4) hours
- or
- Instructor-led Training (ILT)
 - Course Code: 88CLM2007T
 - One (1) Day

PREREQUISITES

- Familiarity with Microsoft Windows
- Familiarity with personal computer applications
- OnDemand CA Client Automation 14.0: Basic Administration & Foundations 200 88CLM20090

Course Overview

The asset management (AM) component within Client Automation utilizes such key functionality as automated discovery of hardware and software inventory, intelligent asset analytics, software usage monitoring and extensive cross-platform reporting, to provide you with a robust set of device tracking and identification capabilities that are critical for properly managing your physical and virtual infrastructures.

In this course, you will be shown how to configure the CA Asset Management agent to effectively manage the collection of hardware, template and software inventory. This course can also be taken as an instructor-led offering with exercises in a live Client Automation virtual environment.

What You Will Learn

- Configure the Asset Management agent for scheduled execution
- Configure and manage the collection of hardware, template and software inventory
- Create and manage the execution of agent jobs
- Monitor console and inventory changes through the use of policies
- Integrate inventory data from CA Mobile Device Management and other external sources into the mdb

For Managers

Asset management provides a variety of management tools that let you monitor, automate, and maintain your systems management functions in a number of ways and thus reduces costs. This course will teach your staff how to configure and use CA Asset Management to provide knowledge of what assets are deployed and realize full-featured asset tracking capabilities through automated discovery, hardware and software inventory, configuration management, software usage monitoring, software license management, and extensive cross-platform reporting.

WHO SHOULD ATTEND

- Desktop Support Analyst
- Desktop Support Manager
- Implementation Consultant
- Release Packager
- Technical Support Analyst
- System Administrator
- IT Asset Manager
