

OnDemand CA Client Automation 14.0: Software Delivery 200

PRODUCT RELEASE

CA Client Automation 14.0

COURSE TYPE, CODE, DURATION

- Web Based Training (WBT)
- Course Code: 88CLM20080
- Four (4) hours
- or
- Instructor-led Training (ILT)
- Course Code: 88CLM2008T
- One (1) Day

PREREQUISITES

- Familiarity with Microsoft Windows
- Familiarity with personal computer applications
- OnDemand CA Client Automation 14.0: Basic Administration & Foundations 200 88CLM20090

Course Overview

The software delivery (SD) component within Client Automation accelerates and automates the deployment of software and other digital content to resources across the extended enterprise. The SD component comprises flexible tools to build, distribute, install, and manage software packages and operating systems on target computers letting you attain full control over the operation and performance of software installed on the computers connected to your network.

In this course, you will be shown how to install, configure, verify, and remove software throughout your business environment in a controlled and standardized way, providing a broad platform and protocol coverage for software administration throughout the enterprise.

This course can also be taken as an instructor-led offering with exercises in a live Client Automation virtual environment.

What You Will Learn

- Use CA Software Delivery through deployment of the CA DSM agent
- Configure and administer the Software Delivery agent
- Register and update packages in the software library
- Integrate CA Patch Manager with Software Delivery
- Organize and maintain the software library
- Setup and manage the Catalog for end-user install on demand functionality

For Managers

This course describes the software delivery concepts and procedures that will let your team administer the controlled distribution and management of software at your site. It benefits anyone who wants to understand how SD functionality solves the problem of managing the distribution and installation of software packages.

WHO SHOULD ATTEND

- Desktop Support Analyst
- Desktop Support Manager
- Implementation Consultant
- Release Packager
- Technical Support Analyst
- System Administrator
- IT Asset Manager

RECOMMENDED NEXT COURSES

- OnDemand CA Client Automation 14.0: Asset Management 200
