

# CA Business Intelligence Reporting Transition from SAP BusinessObjects to TIBCO Jaspersoft 100

## Course Overview

CA Business Intelligence JasperReports Server 6.2 (CABI 6.2) is the new reporting component for many CA products. CABI 6.2 introduces reporting built on TIBCO JasperReports Server 6.2.

JasperReports Server provides powerful reporting built on rich visualization and advanced data analysis capabilities. CABI 6.2 allows you to efficiently and securely manage many reports; interact with reports, including sorting, changing formatting, entering parameters, drilling on data; schedule reports for distribution through email and storage in repository; arrange reports and content to create appealing, data-rich dashboards and easily create new reports based on views designed in intuitive, web-based, drag and drop Ad Hoc Editor

---

### PRODUCT RELEASE

CABI 6.2

---

### COURSE TYPE, LENGTH & CODE
